Simple To-Do List

A beginner Python project that lets you add tasks, view them, mark them complete, and delete them.

Requirements

Python 3. The program uses Python built-in libraries; no extra packages are needed.

How to run

Open a terminal in the project folder and run:

```
py main.py
```

If that command does not work, try:

```
python main.py
```

Menu

1. Show tasks
2. Add a task
3. Mark a task complete
4. Delete a task
5. Quit

Tasks are saved in tasks.json when you add, complete, or delete them.

Project files

main.py - the Python program

.gitignore - files Git should skip

README.md - project instructions

tasks.json - your saved tasks, created when you use the program
